A lot of people seem to like this game, and if you do, that's awesome. But overall, I have to say I didn't like it. The best thing about the game is the artwork. The visuals rank high on the creepiness factor, but the riddles weren't very challenging and gameplay was a little buggy for my taste. If you are a fan of jump scares, then by all means play the game, but as a fan of puzzlers, the lack of challenge on the puzzles kind of killed it for me. I honestly wish there was a middle ground ranking for this game because I would choose that option. It wasn't bad, just not high on my list of games I'd ever revisit or play.. the game itself looks great and my friends bought it, but that's where the fun ends. it just doesn't work online, we were all laughing our heads off as basically everything that could ♥♥♥♥ up did. both my friends would get booted from the game, some people are loading while others are shooting afk players, one guy managed to somehow control the other guys tank and a bunch of other♥♥♥♥♥♥♥♥that i cant remember. i really like it, but ill try playing it again in a few weeks. right now theres no point in recommending it because you cant play it.. Yes i have played this game fully through, it's just that it was the original Japanese version, hence my currently probably low playtime.

Boku to koi suru ponkotsu akuma... Or well... "The Ditsy Demons-" (Yeah, it feels weird to say the English name) is a really great eroge that will definitely satisfy your needs for high quality H sexy content, but don't write off the story just yet. The characters have decently funny dialogue and it's a lighthearted romp to play through, even if ignoring the sex content. But let's get real, the high quality art and H content is the highlight here.

To accurately describe this game would be to say it is a mix between "Charage" and "Nukige" (Charage being character-centric visual novels that have a big focus on romancing likeable heroines. Nukige being a game that is heavily focused on erotic content and filling the game with as many sex scenes as possible.) The mix works well, and as long as you are a fan of both these mediums and love Sayori's excellent art this is a visual novel for you.

Art: 10/10

Characters: 10/10

Overall story: 6-8/10 (Depends on whether slapstick comedy and slice of life is entertaining for you.)

I'm not sure about the translation quality yet, but i assume and hope it is good seeing as it is translated by a company i trust. Oh and for the love of god, buy the 18+ patch! What are you even doing with this game if you miss out on that essential experience?

Anyway, highly recommended game! My favourite character is Arle.

- NorwegianboyEE out -. I love the game, but I had one problem: currently, IT IS IMPOSSIBLE TO FIND AN ONLINE MATCH. This is more of a user-created problem, and I think that more people should play this game. For the benefit of studio, players, and that guy who bought the game.. Just clicking no story. Just nothing. I decided to change my review on this game. WARNING- if you do not own a PC control, then do not even bother. Playing with a Keyboard sucks horribly for this game. If you use a controller, then things get better.. ENG:

Sadly this is a only one & best a fishing a game on Steam just, where you can ride a motorboat & fishing freefoam.

Working & good a game, anyway. :3

FIN:

Valitettavasti ainut ja paras kalastuspeli Steamissa, jossa voi ajaa moottoriveneellä vapaasti.

Tomiva ja hyvä peli, jokataipauksessa. :3. this game would be even better if i could play this in VR!

but its also pretty good for what it is now, its fun, relaxing, can be a bit challenging not to drive your car off a cliff :V

but its worth the money in my opinion!. Dead multiplayer, no co-op and runs badly on modern machines.

This game is good, however there are other games that provide a more definitive Guilty Gear experience. This game is the very first entry into the series and it shows, mechanics are in their early stages, the roster is painfully small compared to other games, and versus is local only-- no online support. I recommend this game for collectors, because it is fun to see the origins of the Guilty Gear series and there is some enjoyment to be found here as a game. If you are looking to jump into Guilty Gear however, I would recommend either Accent Core +R, which has all of the characters in this game and many more, or Guilty Gear Xrd Revelator 2, which is the newest game in the series and has a magnificent tutorial for new players. This game is fun for what little it costs, but I would recommend it for collectors rather than people looking to jump into the series.. The story reminds me of Gravity Ghost but the game play is really bad to me. I wish they just made a story game and left out the platformer.. Pretty fun, but a bit generic and soulless...

5/10

Not recommended, unless you really need to play a generic crash - action based racing game.. The Gameplay just consists of turning those tubes. Although this seems repetitive, i quite enjoyed this game.

Sadly and thankfully, its just about 30 minutes long to beat the 30 levels don't need to be finished on 3 stars for 100%. game would not even start. I own ksp so i had pretty high hopes and i was very dissapointed. Good game for that price
